Product Suggestion

John

Summary

Overall physical weakness and tendency of illness

- $\gamma > 60$ There is higher chance if you catch COVID then develop to complicate respiratory symptoms. During pandemic, please take care of your health well, social distancing, wearing proper mask, and frequently wash your hand. It would be good to take adequate fresh fruits and vegetable or even vitamin supplement to reduce severity of COVID if infected for it know to promote better immune response even from immunization.

METABOLISM

BODY MASS INDEX (BMI) = 20.94

Your BMI is optimal however, BMI is rough indicator to depend on in monitoring general well being more measurable parameters eg. %Body fat should be taken in to consideration for your lifestyle planning

Diet Recommendations

For people with EDEMIC PHENOTYPE, they tend to be Glenoid obesity or Pear shaped obesity, and they tend to store excess calories in the form of Cellulite in thighs and hips. According to the dominant effect of estrogen in people with this phenotype, when losing weight with a 100% no-carb diet, you will lose weight quickly, but majority of weight lost were water content, similar to squeezing water out of the body together of the weight that lost, muscle mass and water also loss together causes Basal metabolic rate to be reduced.

Product Suggestion

John

EDEMATIC PHENOTYPE

Your Personality and Mental Health

Strength: Relax and easy-going people up to the point of absented mind; appearance tend to look younger than average people
Character at age of 9-14 years: Inert and dispose to sedentary habit, over sleepy and fond of eating.
Character at age of 14-21 years: Delicate, grace with affectionate appeal, comes with high intellectual and witful. Indifferent and cold hearted may be seen as a downside of this character.

Highest risk

Lowest risk

- ☒ Sleepiness or narcolepsy.
- ☐ In severe case, water retention in brain cavity (hydrocephalus) can be observed.
- ☐ Hypertension due to edematic and congestive predisposition.
- ☐ Good skin turgor. Body tend to increase body weight and collect as cellulite in hip and thigh. Easier to reduce weight but harder to maintain (Yoyo effect).
